

# Lincoln Electric Laser Solutions

## Laser-Pak® Robotic Laser Systems

Free yourself from the arc with Precision Power Laser™ waveform featured in Lincoln Electric Automation Laser-Pak systems. This arc-free, hotwire laser process is designed to increase deposition rates and travel speeds by heating the wire to the highest degree before entering it into the laser beam. Whether welding or cladding, this process can be implemented to help improve production rates and increase quality.

## Linc-Cut™ CNC Fiber Laser Cutting Systems

The Lincoln Electric Linc-Cut CNC Fiber Laser cutting system is a unitized fiber laser cutting cell offering you premium cut quality at high cutting speeds for your sheet metal fabrication needs.

## Flex Lase™ Handheld Laser Systems

The easy-to-use Flex Lase handheld laser system puts power, speed, and precision at your fingertips. With 2kW of output power, operators can tackle high-precision welding applications with faster travel speeds – up to 4x faster than TIG – helping improve productivity without sacrificing quality.

# Why Lincoln Electric Laser Solutions?

## Laser-Pak® Robotic Laser Systems

## Linc-Cut™ CNC Fiber Laser Cutting Systems

## Flex Lase™ Handheld Laser Systems

As an industry-leading provider of integrated laser solutions, Lincoln Electric offers more than just equipment. From application build-out to comprehensive training, their goal is to ensure you have the tools, expertise, and support necessary for outstanding results.

- **Comprehensive Solutions**

A complete portfolio of laser fabrication solutions tailored to your needs.

- **Expert Support and Knowledge**

Benefit from over 22 years of expertise with unparalleled support and training for seamless integration and safe operation.

- **Tailored Applications**

Custom solutions designed to fit your specific requirements and enhance your operations.

In conjunction with Encore's experienced and local support, you can be confident of selecting the perfect laser solution for your operation and receiving best-in-class customer service after the system is installed.
